

# 3D EMBOSSING FOLDER PLATE

To create your emboss sandwich:

Use a die-cutting & embossing machine platform as a base; no matter which machine you're using, use the standard platform which comes with your machine.

Use the 3D Embossing Folder with your paper in the middle.

Then use the 3D Embossing Folder Plate on top.

ITEM NUMBER	DESCRIPTION	PRICE
149658	3D EMBOSSING FOLDER PLATE	<b>\$10.00</b>

The new plate makes up the difference in measurement between our old-style Dynamic Folders and our new-style 3D Folders in 21 mm gap machines. The 3D Embossing Folder Plate replaces the Standard Cutting Pads in your 3D embossing folder sandwich for continued high-quality emboss results.
